Horsemen,

Listed below please find an updated policy in regard to movement of horses and people leaving and coming into the barn area. This policy may evolve, as the situation demands.

We apologize for any inconvenience however, we believe we are doing what is best for our backside community.

- No ship-in training to the receiving barn.
- No “new horses” will be allowed on the grounds (a horse may be taken to the clinic and be allowed to return).
- No new stable employees will be permitted on the grounds (only personnel who are currently licensed and have been part of the backside community since January).
- As horses leave the premises, the groom should lead the horse on to the trailer and if the transporting personnel are from off property, they should stay in the trailer as much as feasible.
